

EP On the Go!

Education Outreach

If your students can't come to Exploration Place – no problem! We can come to them!

BRING AN ASSEMBLY!

Bring your students together for a live science assembly show at your school's gym or auditorium. It can be for one grade or all grades! Min 50/max 300.

Choose from:

Kick It with Chemistry

Elephant's toothpaste, atomic explosions and frozen flowers will mold your students' minds.

Electrifying Energy

Energize your students as we transfer and transform energy to explore light, heat and electricity.

BRING AN ACTIVITY!

Stimulate your students with science! Activities are standards-based grade-level appropriate. Min 15/max 30 students per classroom. Book multiple rooms per visit.

Choose from:

Kick It with Chemistry or Electrifying Energy Activity Stations

Educator led hands-on activity stations that will build your students aptitude with chemistry or energy.

Hands-On Classes

Choose from grade-level based programs on page 4.

BRING IT ALL!

Combine a live science show and hands-on activity stations or a class for a complete educational adventure right at your own school! Assembly and activity min/max requirements apply.

How does a Bring It All visit work? For example, an Exploration Place Educator will perform your choice of live science show(s) for your chosen grade level(s) in the morning, then rotate through those classes for the remainder of the day. Times are flexible.
